CUSTOM AMERICAN . . .
GENERAL FEATURES

The foundation of the Nomad is its box frame and tongue, constructed with heavy steel cross members and outriggers. The bumper also serves as a carrier for the sewer hose. Outside storage and trunk doors are insulated and each has a lock and key. The entire underside is covered with a prefabricated aluminum subfloor to protect the exposed surfaces. All models have a break away switch as standard equipment.

CABINETRY On 18 through 26 foot models, both wardrobes and overhead storage cabinets are finished and lined. Easily cleaned plastic drawers, with "easy-slide" guides both top and bottom, are used throughout. Wall paneling is textured vinyl and will look new and lustrous for years.

APPLIANCES The Nomad refrigerator has a cooling system that utilizes *three* power sources.

1. 12 volt—to conserve butane gas when traveling
2. 110 volt—for campground use
3. Butane gas—for wilderness campground use

The sink, range top, oven door, and range hood are stainless steel to resist chipping and scratching. Range hoods have a 12 volt exhaust fan and light.

BATHROOMS On the 18 through 26 foot models, *one piece* fiberglass showers or shower and tub combinations are used. These are completely seamless for ease of cleaning and maximum protection against leaks. Also, there is a full six feet of headroom from floor to ceiling of all fiberglass shower and tub combinations.

DINING Wrap-around dinettes are featured on most Nomad Travel Trailers. They are especially popular because they allow people to face one another while dining. Convenient drawer storage is contained under the dinette seat. On 18 foot and larger, five inch polyfoam cushions are featured and have zippered fabric and vinyl covers.

DECOR All cushion fabrics and window curtains are attractively coordinated and of a high quality. The curtains have a vinyl backing that resists deterioration from the sun and gives the material more "body."

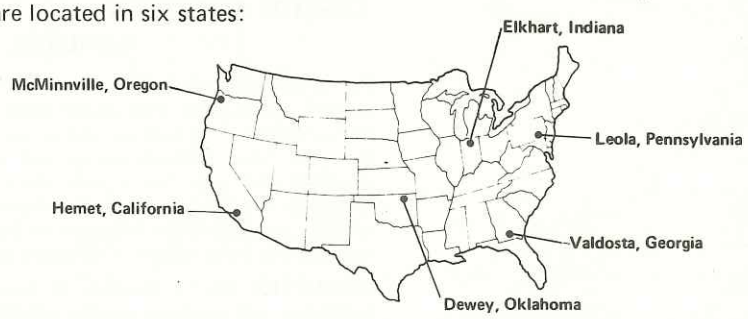
WHY YOU SHOULD CONSIDER A NOMAD TRAVEL TRAILER BUILT BY SKYLINE

Skyline Corporation is one of America's 500 largest industrial companies. This means that your dealer is supported by a nationwide network of dealers and service organizations. Manufacturing plants are located in six states:



Skyline takes pride in the fact that its travel trailers meet accepted national standards for safety and soundness of construction. This fact is evidenced by the U.L. listing on the product. When U.L. authorizes the use of its symbol, it means that a series of difficult and demanding product safety tests have been passed. These tests are followed by periodic in-plant inspections to see that required standards are being maintained.

WARRANTY

If any part of your new Skyline product fails because of a manufacturing defect within one year from original delivery to you by an authorized dealer, it will be repaired without charge for either parts or labor. Misuse, unauthorized repairs/alterations and improper transportation or setup are not covered.

Customer satisfaction is the key to our success. That is why we have a comprehensive, no-nonsense, full year warranty.

A quality product, backed by a national company that is a leader in its field. Add them up and compare a Skyline travel trailer with any other unit on today's market. You'll know why it's an exceptional value.
